

spot7door sensor

Wirepas compatible status sensor

The spot7door sensor is a magnetic door sensor with low power consumption. Signals regarding the status of doors and windows are converted into digital signals and the data is transmitted via Wirepas. This enables the spot7door sensor to provide real-time monitoring, smart monitoring, alerts in the event of anomalies and scene control.

KEY FEATURES

- Wirepas enabled
- 100 m broadcast range
- tamper alarm
- scheduled monitoring
- 2.048 local data storage
- OTA update support

10 pcs in stock

SPECIFICATIONS

Weight	26,6 g
Operating temperature	−20°C to +60°C
Power supply	220 mAh, easy battery replacement, long battery life up to 12 months
